

Feedback from Peer-Review:

We got the following feedback from our peer-review:

1. Some of the pages have inkøbslister in the footer. Upon clicking on it navigates to a homepage where a user can see all lists.
 - a. Feedback:
 - i. It should be redirected to homepage where all the lists are categorized with dates.
2. Loader is showing on left/top of the page
 - a. Feedback:
 - i. it should be on the mid of the page
3. Menu bar is not showing anything
 - a. Feedback:
 - i. It should show user guide or something like Dark mode and Light mode reactivity
4. Detail Page:
 - a. Feedback:
 - i. Should be reactive i.e. a user should be able to add products in the same list
 - ii. More than one products should be added
 - iii. Clicking on one Product should change the Co2 value, hight/medium/low should be changed depending upon the Co2 in the header
 - iv. After change in the list, it should be saved to Firebase Database.
5. Header:
 - a. Feedback:
 - i. Lists are scrolled, but header should be fixed or may be sticky
6. It should also be possible that list (url link) will be shared to others.
7. Frontpage:
 - a. We have categorized lists into two categories. One is the current 30 days list items and the other is previous month.
 - b. Feedback:
 - i. We should have more categories e.g. last 7 days, 2 weeks, 3 weeks, previous 2 months(all list items that are more than 2 months old)
 - ii. Sorting list each time when it is added in descending order (current should be on top). If I have two lists in the same order then it should be ordered in alphabetically in ascending order
8. Add-new-list:
 - a. Currently, one can write listname, and can choose products.
 - b. Feedback:
 - i. Delete functionality should be provided

- ii. After selecting the product, product text box should be empty
- iii. Product quantity should be added or subtracted by pressing plus button and minus button respectively. Both buttons should show quantity in between them.
- iv. If user will add the same product then its quantity will be added too.
- v. In the form we should have Save and Cancel buttons. Cancel button will redirect back to homepage

9. Footer:

- a. Feedback:
 - i. Footer should be fixed/sticky
